Yi (Zoe) Zhang

(408) 569-2741 | yizhang.zoe5@gmail.com | LinkedIn | GitHub | Portfolio

Education

Northeastern University San Jose, CA
M.S. in Information Systems — GPA: 4.0/4.0 *Jan 2025 – Dec 2027*
- Founder & President, HuskyCode Club: 210+ member student coding club; Campus Best Club Award

Experience

Evenness San Jose, CA
Full Stack Engineer Intern *Jun 2026 – Aug 2026*
- Worked across two teams on a11yFORGE, a health-personalized accessibility platform spanning a Chrome extension, an embeddable JS widget, and a REST config service, contributing to architecture and code reviews
- Designed a Shadow DOM widget architecture that ported the Chrome extension into a single embeddable script, letting enterprise SaaS customers offer a11yFORGE without an extension install; isolated styles and DOM from host pages and kept it compatible with strict CSPs
- Implemented JWT-authenticated config fetch against the REST API so each customer's widget loads its own feature settings at initialization, plus a remote kill switch to disable the widget instantly without customer redeploys
- Built React components and content scripts that detect and remediate inaccessible links and controls, meeting WCAG with full keyboard navigation, ARIA annotations, and dark mode
- Wrote 30+ Node.js unit and smoke tests covering link-accessibility detection, widget initialization, and API failure paths such as expired tokens and network errors, running in CI to catch regressions before merge

Northeastern University San Jose, CA
Research Assistant | *Link* *May 2025 – Aug 2025*
- Faculty researchers were spending over an hour manually checking each dataset before analysis; built a data validation web app with them that cut the process to under 1 minute for datasets of 10,000+ rows
- Built a PapaParse and SheetJS validation pipeline that ingests CSV and Excel files and flags missing values, duplicates, and statistical outliers, processing everything client-side so research data never leaves the browser

Projects

PronunciAid | *TypeScript, Chrome Extension APIs, YouGlish API* | Link Dec 2025
- Shipped a Chrome extension that plays any selected word in real video context, cutting lookup time from 15+ sec to under 2 sec; grown to 108 active users and counting, 5-star rated, featured by Northeastern and YouGlish's blog
- Expanded from English-only to 24 languages and added a popup display mode in direct response to user feedback, and migrated the codebase to strict TypeScript with shared interfaces for persisted settings

Pawstructured | *FastAPI, Python, Google Gemini API, Google Sheets API* | Link Aug 2026
- Built an AI pipeline that placed top 10 at the Dogathon 2026 hackathon, turning dog rescues' free-text intake write-ups into structured adoption records and social posts, replacing manual rewriting
- Designed a FastAPI backend with an extraction endpoint that prompts Gemini to return breed, age, requirements, and traits as structured JSON, and a caption endpoint that drafts social posts; synced records to Google Sheets

TrueHire | *PostgreSQL, Supabase, React, Vercel* | Link 2026
- Built a two-sided recruiting platform that gives recruiters ranked candidate matches; designed a normalized 9-table PostgreSQL schema spanning profiles, experience, preferences, job postings, and profile-view analytics
- Moved candidate matching server-side into a Postgres function that filters on job type, work mode, location, and visa sponsorship via array overlap, and ranks by keyword relevance, replacing client-side filtering of every candidate
- Enforced per-role data access with Row-Level Security and trigger-based role assignment, and made multi-table profile updates atomic through a transactional database function

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL
Backend & Data: FastAPI, Node.js, REST APIs, JWT, PostgreSQL, MySQL, Supabase
Frontend: React, Chrome Extension APIs, Shadow DOM, Web Accessibility
Cloud & DevOps: Git, CI/CD, Unit Testing, AWS, Docker, Terraform, GitHub Actions, Linux
AI: LLM APIs, Prompt Engineering, Structured Output Extraction
